-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 14-27, drawn to debt instrument, classified in class 705, subclass 35.
 - II. Claims 28-29, 30-31, 33, 34-39 drawn to insurance, classified in class 705, subclass 4.
 - III. Claim 32, drawn to insurable instrument processing, classified in class 705, subclass 4.
 - IV. Claim 40-42, drawn to plurality of different types of bond instruments, classified in class 705, subclass 35.
 - V. Claims 51-53, drawn to insurance in conjunction with municipal securities, classified in class 705, subclass 4.
 - VI. Claims 43-50, drawn to apparatus for bond trading, classified in class 705, subclass 36.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, IV, and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one

subcombination is separately usable. In the instant case, subcombinations as claimed do not require the particulars of the other subcombinations as claimed because:

Group I is directed to system and method for debt instrument,

Group IV is directed to method for different types of bond instruments, and

Group VI is directed to apparatus for bond trading.

Inventions II, III, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombinations as claimed do not require the particulars of the other subcombinations as claimed because:

Group II is directed to method insurance for bond and insurable instrument.

Group III is directed to method for processing insurance for insurable instrument.

Group V is directed to method for insurance in conjunction with municipal securities bond.

where each has separate utility such as: communication, multilevel financial aid, interactive application, and processing application. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR

Art Unit: 3693

1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Spoke to attorney Michael Fortkort (Reg. # 35,141 – Phone: 703-435-9390) on 10/14/06, Mr. Fortkort asked to mail restriction in writing.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harish T. Dass whose telephone number is 571-272-6793. The examiner can normally be reached on 8:00 AM to 4:50 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James P. Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
